

# Trimform Rooflights

## Rooflight supply

Trimform Products supplies GRP rooflights to suit Trimform and others roofing profiles including profile-matched obsolete roof profiles. For rooflights to suit Profile 6 and Profile 3 fibre cement sheets refer to Trimform.

The rooflights are manufactured from glass reinforced polyester resin (GRP) providing effective and diffuse daylighting without hot spots or excessive glare.

The selection of material weight is dictated by the non-fragility status and applied loadings. The fixing and sealing methods are critical to long term durability and non-fragility.

Rooflight supply

## Safety

Safety

Note that a rooflight profile classed as non-fragile is only non-fragile when completely fixed to the purlins.

Keep foot traffic on a roof to a minimum and make anyone getting onto the roof aware of the risk of treading on rooflights. Rooflights must not be walked on.
